

IINNLIGHT PRO™
THE REJUVENATING POWER *of* LIGHT

LIGHTING *the* PATH *to* WELLNESS

TRANSFORMING *and* ENERGIZING LIVES *with the* WORLD'S *first* MOLECULAR MASSAGE™

Just as plants need sunlight to thrive, the human body needs light to maintain health and well-being. Human cells are activated by particular wavelengths of light called photons, which are absorbed through the skin and into tissues. At the cellular level, the photons are transformed into life-force energy that stimulates the growth, repair and regeneration of the human body.

That is the science behind light therapy.

Using Light Emitting Diodes (LEDs) to deliver the rejuvenating photon light, iinnLight Pro™ therapy system delivers the world's first Molecular Massage™, which jumpstarts and works in unison with the body's own intelligence to create the most natural form of anti-aging.

By offering iinnLight's Molecular Massage™ therapy to your clients, you can achieve a competitive advantage for your spa.

iinnLight Pro™ represents the state-of-the art in facial and wellness rejuvenation services. Molecular Massage™ sessions are just 30-minutes in length and do not require additional employees or a licensed technician. You simply choose which benefit you wish to address for your client, hit start on the iinnLight Pro™ equipment, and then walk away. It's that easy!

Because iinnLight Pro™ frees up your time for other services, you can increase spa revenue at no additional labor cost. What's more, light therapy increases the efficiency of other treatments, such as microdermabrasion, facials, and oxygen serums, giving you the opportunity to up-sell your spa's other services and products.

"IN MY WELLNESS PRACTICE, THE GOAL IS TO BE HEALTHY, FEEL GOOD AND LOOK GOOD. THE NATURAL HEALING AND REJUVENATING POWER OF IINNLIGHT THERAPY CONTRIBUTES TO THE SUCCESS OF MY HOLISTIC PROGRAM. MY PATIENTS EXPERIENCE BENEFITS IN THEIR GENERAL SENSE OF WELL-BEING AND THE CONDITION OF THEIR SKIN, PLUS THERE'S A REDUCTION OF INFLAMMATION."

*Dr. Jolanta Lukawski
The Grace Center for Wellness*

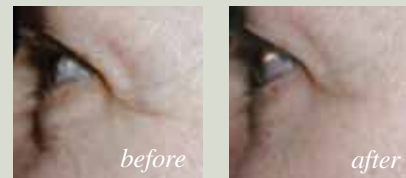

GIVE YOUR SPA CLIENTS WHAT THEY DESIRE MOST: STRESS RELIEF, BEAUTY, RESTFULNESS AND HEALTHY AGING.

Because iinnLight Pro™ uses safe and non-invasive light, the therapy is completely risk free and can be administered multiple times per week as an affordable way to promote wellness and healthy aging. In just one relaxing light session, the iinnLight Molecular Massage™ can provide the following benefits:

- Rejuvenation of new cells
- Noticeable glow to skin and complexion
- Profound stress relief
- Increased mental clarity
- Sense of relaxation and well-being
- Relief of aches and pains
- Refreshed energy

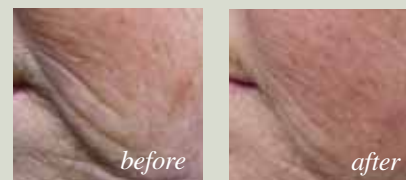

"I had deep lines on my upper lip. They are filling in and my face feels smoother, healthier, less rough, like my skin has a better quality to it."

Carol C. after 4 iinnLight Pro™ sessions

"I am seventy years old and am amazed at the results after only 8 half-hour sessions. I felt relaxed, yet had an increased energy which lasted for days."

Nancy T. after 8 iinnLight Pro™ sessions

IINNLight PRO MOLECULAR MASSAGE™ THERAPY PROGRAMS

What makes iinnLight Pro™ different from other light therapy systems is its unique configuration. The system utilizes multiple wavelengths (colors) of LED illumination controlled by proprietary software algorithms. The healing light energy stimulates the immune system at the cellular level, making iinnLight's Molecular Massage™ therapy a safe, affordable and non-invasive solution for the visible signs of aging and other degenerative issues of the body.

- The Facial Program bathes the face with all wavelengths (colors) of LED illumination. This encourages the production of collagen, reduces the appearance of fine lines, and even promotes renewed energy and vitality.
- The Blue Wave Program bathes the face with primarily blue wavelengths of LED illumination, thereby elevating the mood, increasing alertness and helping to reset the body's biological clock in the case of jetlag.
- The Relief Program bathes the face or body part with primarily red wavelengths of LED illumination, providing relief from many aches and pains, reducing inflammation and helping to relieve stress.
